VISITOR MANAGEMENT

Description:

Streamline the visitor management process with smart and secure visitor management system through providing the visitor pass and hosts get notified when visitors arrive and register

- Utilized HTML, CSS, Bootstrap to build responsive and visually appealing components that streamlined the visitor check-in/check-out process
- Ensured seamless functionality across various devices, focusing on mobile-first design principles for optimal user experience on mobilephones and tablets
- Utilized JavaScript and React.js to make the application single page application
- Managed the state globally through Redux and managed sideeffects through Saga middleware
- Version control through git

Technologies used: HTML, CSS, Bootstrap, Javascript, ReactJs, Redux, Saga

Tools used: VS code, Git, Swagger, Postman
